C O N C E P T X T 2 0

C O N C E P T X T 2 0

The Concept series is extended to include a 20 mm thick version, marking the start of a new generation of Ragno products for the outdoor world.

XT20 will be the identifier of the collections in a range that will gradually be expanded to cover new types in terms of appearance, to provide the right solution to various lifestyles outside as well as inside the home.

Patios, gardens, street furnishing, beaches, hospitality areas, driveways and garages are the ideal locations for benefiting from the technical features delivered by these products, which combine top level performance with the successful styling and patterning of the indoor collections with conventional thickness, providing seamless continuity of material and look between indoors and out.

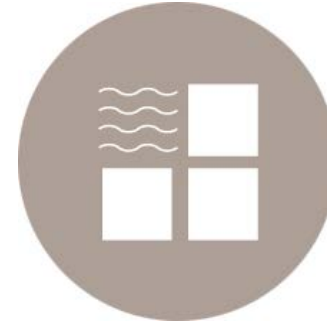

WHERE

Terraces

Gardens,
Paths
Street Furniture

Beaches,
Beach Resorts

Hospitality

Industrial Areas

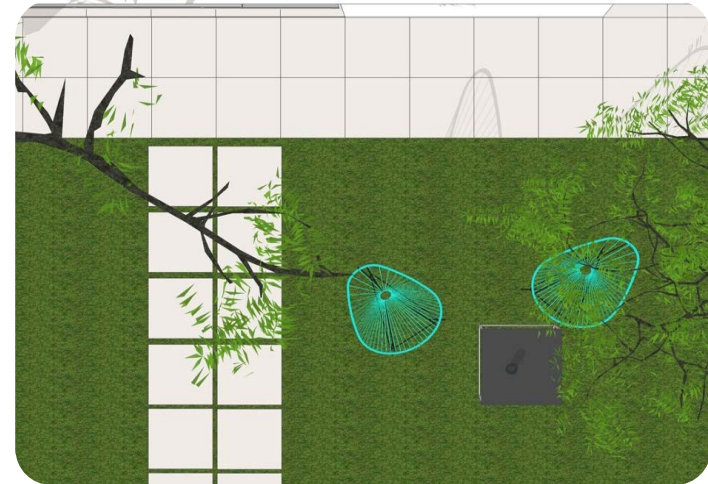

Vehicle Entrances
and Garages

INSTALLATION SYSTEMS

Laying on grass

Where:

- _ Gardens and paths of homes
- _ Residential complexes
- _ Public parks
- _ Leisure areas

Plus:

- _ Fast installation
- _ Easy removal and repositioning
- _ Cost savings, as no skilled labour is required
- _ Immunity to moulds and chemicals

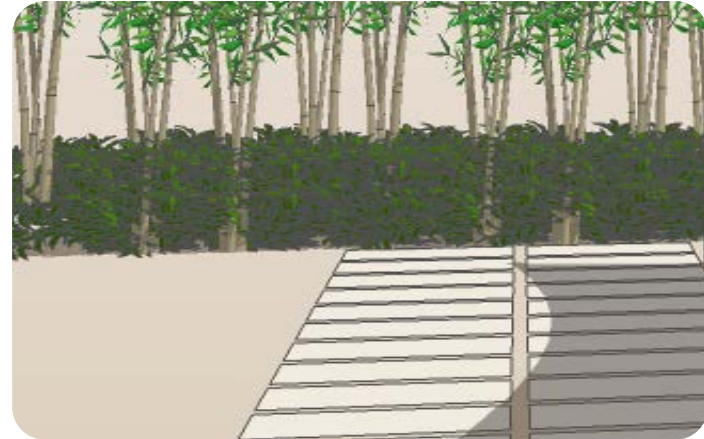

INSTALLATION SYSTEMS

Laying on sand

Where:

- _ Ideal for creating paths and walkways within beach resorts

Plus:

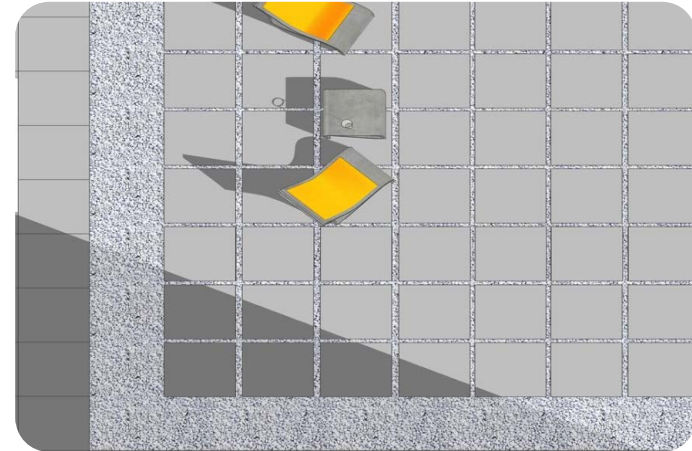

- _ Fast installation
- _ Easy removal and repositioning
- _ Cost savings as no skilled labour is required
- _ Resistance to salt spray and weather
- _ Skid resistance, even for bare feet

INSTALLATION SYSTEMS

Laying on gravel

Where:

- _ Patios
- _ Paths
- _ Pedestrian walkways
- _ Courtyards and relaxation areas

Plus:

- _ Fast installation
- _ Easy removal and repositioning
- _ Cost savings, as no skilled labour is required
- _ Effective rainwater drainage through the open joints
- _ Creation of seamless surfaces, since expansion joints are not required

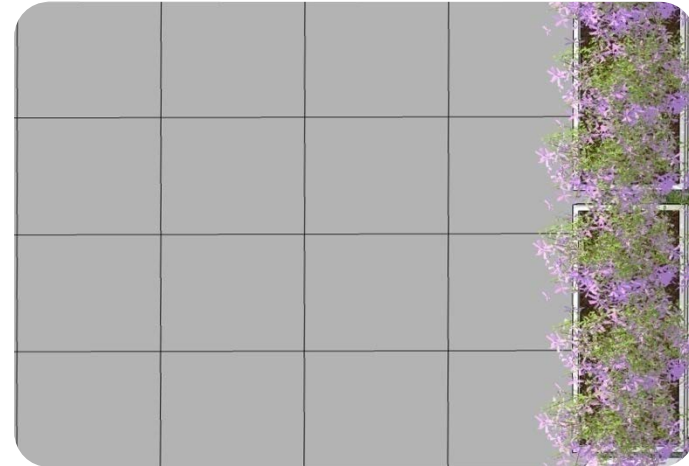

INSTALLATION SYSTEMS

Laying with adhesive

Where:

- _ Outdoor areas used by vehicles
- _ Entrances to garages
- _ Car parks
- _ Yards

Plus:

- _ The system's excellent resistance to dynamic and concentrated loads
- _ Option for use of the same material in pedestrian and vehicle areas
- _ Suitability for both residential and public or retail locations

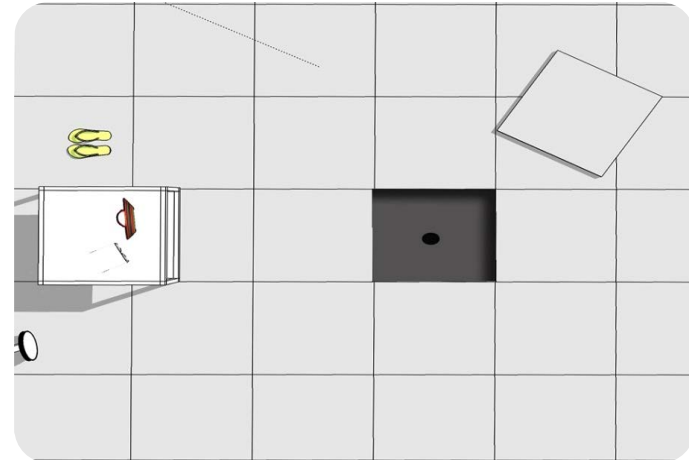

INSTALLATION SYSTEMS

Raised pavings

Where:

- _ Terraces
- _ Residential and public spaces

Plus:

- _ They are able to house electric wiring and water supply and drainage pipes
- _ They ensure easy maintenance: individual panels can be lifted
- _ No need to demolish the existing floor prior to installation
- _ Better thermal insulation thanks to the ventilation below the paving
- _ Flat laying across the entire surface
- _ Rainwater drains along the grouts thanks to the gradient of the substrate
- _ No need for setting times
